AI-Powered
MRO Asset Management

USE DATA TO DRIVE EFFICIENCY & RESULTS

Optimize your MRO asset management with **AI-powered technology that streamlines operations**, breaks down organizational silos and balances working capital and risk across your manufacturing network.
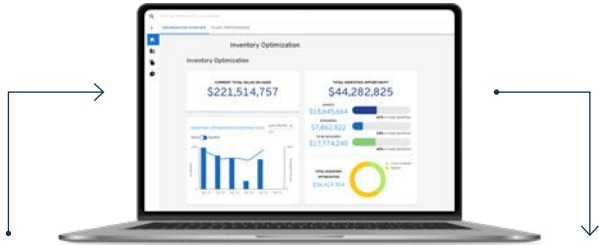

PURPOSE-BUILT FOR MRO

10 - 20%
Reduction in Working Capital on Average

10x
Average ROI

HOW IT WORKS

ATS intakes your data across ERP/EAM/P2P instances & business units, then applies intelligence & data science to deliver actionable insights that drive business results.

CUSTOMER DATA SOURCES

- Material Flows
- Consumption
- Purchase Orders
- On-hand Inventory
- Stocking Policies
- BOMs
- Lead Times

CUSTOMER BUSINESS RESULTS

- Reduce Working Capital
- Improve Service Levels
- Network-Wide Material Visibility
- Reduce Search/Order Cost
- Reduce Factory Downtime
- Ops/Procurement Alignment
- Informed Decisions

ELIMINATE COMMON MRO CHALLENGES

- Unplanned Factory Downtime
- Wasted Working Capital
- Human Resource Constraints
- Non-Standardized Data
- Disconnected & Manual Processes
- Project-Based Data Projects

SIMPLE

Designed to make inventory management easy.

SCALABLE

Scale data and recommendations across plant locations.

SUSTAINABLE

Improve parts efficiencies and minimize waste for a more sustainable process.

MEASURABLE RESULTS

Fewer Stockouts

Fewer Incorrect Parts Issued

Increased Operational Performance

Find Parts Faster & Easier

Overcome Data & Team Silos

Cost Savings Opportunity Visibility

OPTIMIZE MRO SPEND WITH REAL-TIME INSIGHTS

✓ **Harmonize MRO data** across plants, systems, and teams without time-consuming, costly data cleanses

✓ Simultaneously **optimize existing inventory levels** while reducing risk

✓ Gain visibility to MRO materials across your networks via **fuzzy search** capabilities

✓ Capture the **team expertise & knowledge** for improved decision-making

✓ Proactively address **tail spend reduction** opportunities in your supplier negotiations and contracts

✓ Onboard quickly with **minimal IT resources** and unlock value within 60 days

STOREROOM

Optimize your inventory with a structured, on-site parts management program, designed to improve inventory accuracy and reduce overall spend.

RPM

Enhance reliability with a data-driven, on-site repairable parts management program, built to continually improve the reliability of industrial components and the machines they go into.

PARTS SERVICES

Streamline your part and supply needs—repair, surplus and new— all supported by our state-of-the-art service center that helps get your equipment back up and running.
